Serie Walter

EA
FEEDER WORLD CHAMPION

Regarding product developments, it has been a long journey for almost 30 years for our company, and the proof of their success is our results what have been achieved during the „major” competitions.
Here is a list – without being exhaustive – from 2019 to justify these achievements:

Feeder Fishing World Championship for Clubs – Portugal.
Maros-WalterLand Team is the Club World Champion!

World Fishing Games – South Africa
Course Angling Ladies WC – 1st place Hungary (three members of the Hungarian National Team are sponsored by Maros Mix.)
Feeder WC – 1st place Hungary (most of the Hungarian National Feeder Team are from Maros-WalterLand Feeder Team)
Carp WC – 8th Hungary. Hungarian pair's are the members of Maros-WalterLand team.

Course Angling WC Youth – Peter Bakó (former Juniur World Champion) finished 2nd place Individual in Spain 2019

National Method Feeder Club Championship – 1st place Maros-Mix Team

National Carp fishing Club Championship – 1st place RaceR Team, members: Peter Roskó and Tamás Kis (from Maros-Walterland)

National Ladies Individual Championship – 1st place Hajnalka Kovács

National Individual Feeder Championship – 1st place Soma Arató

Just to mention the greatest achievements...
The developments continue, of course, every new experiences are very succesfull for providing new products.
The new EA Wafter pellets are also coming on the market on affordable price and in comfortable packaging!
Also good news for matchanglers, that product range of leams continues to expand and the well-known MAROS particle binder is available again from 2020.
Continous improving of the production and the awareness of our colleauges guarantee that our products can be used succesfully under the most different circumstances!

„Using MAROS products is not the only way of successful fishing, but it makes cathing fish easier for everyone.”

GROUNDBAITS with technology of PELLET TUNING

ECO series 1-3-8-15 kg

Over the past years ECO product line has gone through important changes. We intensified the efficiency with a new production technology called PELLET TUNING, which was exceptional step in this price-range. Thanks to this innovation fish spend much more time in the place of feeding so we could improve our chances to catch them.

And what could ECO series offer? Easier mixing, increased flavour, reliable quality, wide range of products - 20 different tastes, various packaging (1-3-8-15 kg) satisfy all expectations, suitable for a number of fish species, in many different flow conditions. The pictures show the difference between dry and mixed groundbait.

MAROS FEEDER

Groundbaits

MAROS^{mix} Feeder Series 1 kg

This series was developed for feeder and traditional ledgering. Sticks well but breaks down quickly on the bottom so your hookbait is soon exposed and shows its attraction really fast. Thanks to their intensive flavour, smell and colors these groundbaits are suitable not only for feeder but also for float fishing.

MAROS^{mix} Method Box

One of the most successful groundbaits for carp, the Method Box is made with premium quality halibut pellets and boasts a very strong aroma. Tried and tested for years, it will not let you down in the worst of conditions even when other baits give up. Each Method Box contains one decilitre of Maros Mix Extra Aktivator, which is a delicious aroma concentrate. Due to its special ingredients, this activator will spread horizontally on the bottom while dissolving. Carp are mainly bottom feeding fish and the activator will help them find the groundbait itself.

MAROS XXL

Groundbaits

MAROS[™] XXL series 1 kg

Groundbaits of XXL series were improved specifically for competition fishing and only selected and high-class ingredients are used during production. This product line could prove its efficiency on any types of water in any considerable international contest. It's a typically matchfishing groundbait and we take great pains over seed roasting process. Thanks to that we get a really rich mixture with a highly harmonic flavour. XXL series is the best choice for feeder and bottom fishing!

EA Groundbaits 2 kg

Over the past years Maros-Mix extended their product range with EA Record Groundbaits. These groundbaits are based on the Hungarian master angler – Erdei Attila's secret recipe and all of them have a pretty big effect on carps, breams and crucian carps all the year round. EA Record mixture has helped a lot Attila to achieve much of his success during each competitions. The main attribute of this series, next to the exceptional production technology, is easy-mixing.

EA Record Special black

The newest member of EA Record Groundbaits. It's characterised by extremely complex and prime contents. The large and active area (caused by fine grains), the dark color, intensive effect of taste and aroma make this mix pretty efficient. This groundbaits will probably become the base mixture of not only feeder but fine and float fishing as well.

Item no.	Name	Taste	Weight(kg)
MAEA207	EA Record strawberry	strawberry	2kg
MAEA208	EA Record river	cheese-caramel	2kg
MAEA201	EA Record roasted	oil seeds	2kg

MAEA204	EA record special	sweet spicy	2kg
MAEA205	EA Record extrem carp	vanilla-lemon	2kg
MAEA209	Special Black	sweet seasoning	2kg

MAROS Feeder rods

Actually EA Trinity feeder rods are a bit revised and sensibly renewed version of Tubertini feeder lines, that improved by Erdei Attila's professional experiences. At first sight, maybe you will notice the divided EVA handle. For more comfortable holding, the division of handle got higher for reel seat, and last but not least it was also a main point during development that the material of EVA can be lightly kept clean. The 2+1 sections stayed the same, so the rods can do well during more difficult fighting as well. The extremely thin body, that absorbs the power of fish, helps much the anglers during each fightings.

The shortest 2,7 and 3-meter versions are best suited for casts between 10 and 25 meters. In addition to margin and canal fishing, they can also be great companions for boat fishing. Use these beauties with a fine feeder rig and a long hooklength.

I believe the top-pick amongst ambitious match anglers will be the 3,30-meter light version. Its main targets are whitefish and it's a perfect choice for winter carping as well. During its one-season test period, this rod has helped me to section wins at the Hungarian Championship in Szeged and at the World Championship in Italy.

The 3,60-meter medium rod is suitable for casts up to 50 meters and can also be used with light method rigs.

Our product development resulted in having rings of the right sizes and in the right positions, making this a very handy rod.

Even the quiver tips have been further developed. There is one additional ring on the tips and this yields a more consistent power distribution and bend. Furthermore, the tips have different potentials (0,75; 1 and 1,5 oz) but identical lengths. This is a great advantage when transporting your rod as there is no tip reaching beyond the lower rod section.

I hope the EA Trinity light feeder rods bring you many years of good memories and you'll enjoy them as much as I do.

Serie Walter

SERIE WALTER METHOD CRUSH GROUNDBAITS

Owing to his World and European titles Tamas Walter is one of the best-known anglers in Hungary and the International match fishing World. After 20 years of experience and knowledge he has developed his own Serie Walter range of groundbaits.

Using the finest quality ingredients this **METHOD CRUSH** series of groundbaits are the perfect solution for every carp fishing situation, whether it be for a weekend pleasure session or the World Championships. Made by a special pellet crushing process, these homogen-structured, high protein content fishmeal groundbaits are perfect to use all year round.

The original colors and smells of fishmeal and fish-oil are the main features of MASTER. This natural mix is available in green color called GREEN, and the almost fully black DARK. Together with the reddish KRILL and the bigger grained MONSTER-G these 5 groundbaits are covering all varieties of fishmeal. As **METHOD CRUSH** serie contains mainly crushed pellet, its stickness and opening time gives a perfect performance.

MASTER

This natural mix is the base of **METHOD CRUSH** product line. Only the top quality fishmeal and fish-oil give its smell and color without any added colouring or aroma. Actually it's the starting point of the special pellet-crushed and homogeneous structured **METHOD CRUSH** groundbaits...

Item no.	Name	Weight
MASW120	SW Method Crush Carp	1kg
MASW121	SW Method Crush Green	1kg
MASW122	SW Method Crush Dark	1kg
MASW123	SW Method Crush Krill	1kg
MASW124	SW Method Crush Monster	1kg

GREEN

Green colored version of **MASTER**, which is perfect for carp fishing on intensively fished waters all year round. Thanks to its green color, it is very close to the tone of the natural lakes with vegetation. **GREEN** is the most universal part of the serie, anywhere and anytime could be used.

DARK

Pretty dark colored – when it's wet, it's almost black. As a dark version of the **MASTER** mix, this is the groundbait of the cold waters of autumn and winter or the early spring. Its fishmeal and fish-oil content is the same as **MASTER** and **GREEN**, but its color is even darker so is less visible on the dark bottom. Both **MASTER** and **GREEN** could be darken with the help of **METHOD CRUSH DARK**, even for summer fishing on those slowly days.

KRILL

KRILL is also a homogeneous grained, fishmeal based groundbait, as former three, but instead of fish-oil, a big amount of special krill extract provides **KRILL**'s smooth color and overpowering smell. It could be perfectly used all year round. When wet, the groundbait is nearly red. Owing to its colour this mixture could be a great groundbait using bright colored pop-ups and wafers on the hook.

MONSTER-G

Is definitely developed for catching the big ones. Besides **MONSTER-G** stimulating the fish to eat, it helps to keep them in the area as well. Unlike the other 4 groundbaits of **METHOD CRUSH** serie, it's inhomogeneous structure, contains 2mm black halibut pellets among other big ingredients. Its smell comes not only from the fishmeal and fish-oil, but also from a special aroma developed for this particular groundbait.

Serie Walter

Item No	Name	Weight
MASW101	SW Racer Panettone Carp	1kg
MASW102	SW Racer Panettone Black	1kg
MASW103	SW Racer Sweet Corn Carp	1kg

MASW109	SW Racer Roach	1kg
MASW110	SW Racer Sweet Corn Black	1kg

The flagship products of the Serie Walter range of groundbaits for float and feeder fishing. "Professional "RaceR" stuff but not only for competitors...!"

PANETTONE CARP: Its smell is similar to the classic Italian cake. The light-brown colored mixture has fruity and vanilla aroma at the same time, its goal fish is Carp and bigger Crucians.

PANETTONE FINE: The finer and a bit stickier version of the original Panettone. A real fish-magnet.

PANETTONE BLACK: It has the same content as the original Panettone but with finer particles in black color.

SWEETCORN CARP: Its goal fish is Carp and not the tiny one! It's a yellow and a really granulous groundbait with sweetcorn smell which helps us to keep fish in such a wide area for hours and hours.

SWEETCORN FINE: It has the same content as the original Sweetcorn but with a finer texture and more binding power, suitable to carry loads of corn or other particles.

SWEETCORN BLACK: It has the same content as the original Sweetcorn but with finer particles or in black color.

BREAM: It's one of the most intensive smelling bream mixture on the market. A type of fine groundbait in that the cinnamon and

the coriander dominate. You could create a drier or also a sticky mixture, it only depends on the amount of water.

RIVER: The most sticky groundbait among SW Racer products. It's a really homogeneous mixture with that you could take a big amount of additives to the bottom. Its smell is chocolate and roasted – because of the oilseeds, and its taste is sweet and salty at the same time.

ROACH: A high-end competition mix but not only for roach. Nice brown color, smooth sweet coriander smell and a continuous attraction for hours owing to its quality ingredients and natural herbs. It can be adjusted to lakes or rivers by the quantity of added water and leam.

ROACH BLACK: Born at the match venue, rich in section wins and oilseeds. When wetted properly this mix is suitable for anything from on the drop lake to river feeder fishing. Target fish are bream, silver bream and roach.

Serie Walter

This is a quite wallet-friendly groundbait which produced by Tamás' own recipe and is really value for money. It's a typical granulous and tacky mix with excellent content.

SERIE WALTER FEEDER BIG: yellowish color, corn-scopex smell, pretty granulous Carp mix. When size really matters!

SERIE WALTER FEEDER RED: red color, almond smell, coarse-grained Carp mix. Suitable for waters full of fish, all year round.

SERIE WALTER FEEDER DARK: black color, almond smell, coarse-grained Carp mix. Use when the weather gets colder or if the fishes are more shy

SERIE WALTER FEEDER BRASEM: brown color, intensive caramel smell, coarse-grained Bream mix but not only for Bream.

SERIE WALTER FEEDER BARBEL: red color, cheese smell, coarse-grained river mix. Typical groundbait for Barbel, Nase, Ide or big Bream.

SERIE WALTER FEEDER CARP: light color, almond smell, coarse-grained Carp mix. Really summer time groundbait.

SERIE WALTER BIG BLACK: The most popular stuff of SW FEEDER SERIES, the black colored version of SW FEEDER BIG. Because of its grain size, components, smells and colors this groundbait is suited for fishing of bigger carps in pure water as well.

SERIE WALTER FEEDER CHEESY: Light brown color, intense cheese smell, coarse-grained river mix for barbels, nase and all other river species.

MASW052	Hook pellet	SW WAFTER SWEETCORN 8-10MM	30g

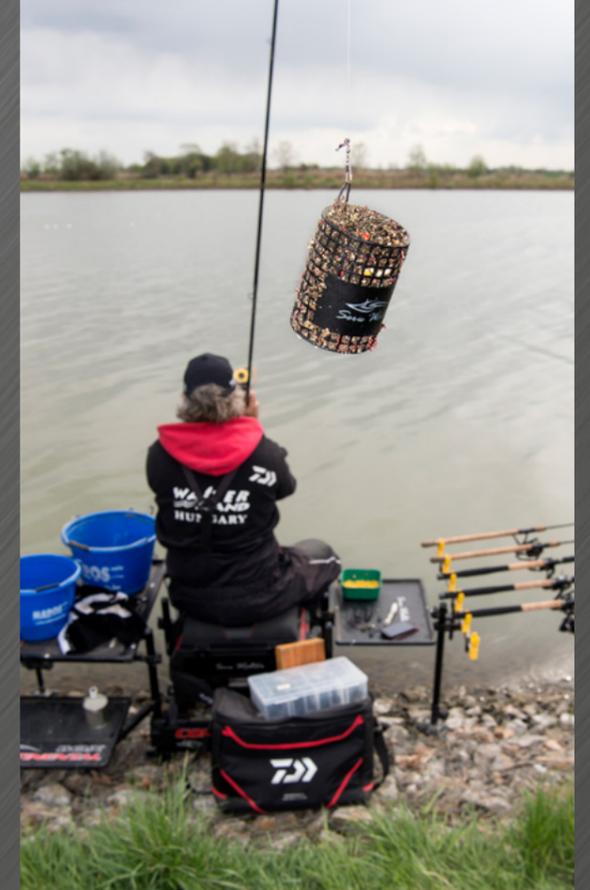

FEEDER BASKETS

Walter Tamás' favourite feeder baskets from 10g to 200g for all competition situations! Thanks to the special surface, they don't shine on the bottom and don't trap the groundbait in.

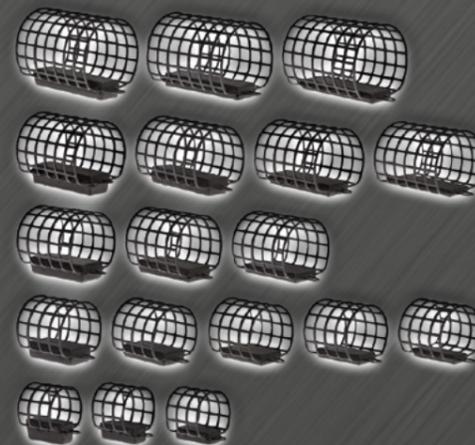

The BIG gun!

The max sized (5x7 cm) – allowed by FIPS – basket with removable plummet.

TUNNEL FEEDER

This easy-to-use TUNNEL FEEDER series are ideal for still or sluggish water, for cast of 10-50m. A wide range of feeder baskets, which have a special tunnel shape.

SW PELLET BOX

One of the most successful methods of modern carp baiting is the use of binding micropellets wetted by a concentrated liquid additive. The superior quality fishmeal pellets and the dense activator liquid found inside the new Serie Walter Pellet Box can be used for both method fishing and to enhance a classic groundbait mix.

HEAVY RIVER LEAM 2KG: World class river leam from Belgium.

River (Heavy) Leam: Terre de Riviere with lots of binding power, suitable for carrying live bait and to make the base mix heavier. Can be used on deeper lakes and rivers, both for float and feeder fishing. Now available in black colour as well.

DAMP LEAM 2KG: World class damp leam from Belgium. Damp Leam: a light, slightly binding leam creating a cloud in the water. Perfect for carrying live bait and to be added to your groundbait. Can be used in lakes and slow moving rivers, both for float and feeder fishing. Now available in black colour as well.

Boiled seeds

MAROS Best before 2 years

Boiled seeds are the oldest and maybe one of the most effective baits. By the help of that you could achieve massive catches of carp and also grass carp all the year round. During fishing there are many way to use these different boiled seeds - use as a mix with ground-baits, loose-feeding with catapult or even simply put on the hook.

Fermented seeds and Froundbaits

MAROS^{mix} The Stinky Giant

A bait developed specifically for selective carp and grass-carp fishing. Almost unbearable for the human nose, its odour is very attractive for large fish as they are accustomed to ripe/fermented seeds falling in the water during the summer season. This groundbait series can go through great improvements in 2019! As a result of our research and development, we can now put a dry version of these stinky baits on the market, which can be further enhanced with special carp and grass carp additives.

Puffed cereals and polentas

EA Dual Wafer ^{NEW}

In the last few years I've experienced during my method feeder fishing, that the most important feature of a good wafer pellet is its ideal size and the optimal lift. This means that the lift of pellet must perfectly balance the weight of the hook and its diameter must match to the size of the hook. Color and taste are coming on the list of priorities only after these. Anyway the choice of color and flavour depends on many-many things:

- how clear is the water,
- what time of the day,
- temperature of the water,
- colour and material of the bottom
- qty of planktons living in the water
- what kind and what size of fish is our target

They all affect the colour and taste of the pellet which we can be the most successful with under the given circumstances.

The „dual” aspect of these MAROS EA wafers comes from the double colours and flavours. Dual Wafers can be provided in 6 and 9mm sizes, and I think the following 5 pair of tastes give enough options you to find the right choice. Size, lift, colour and flavour will all match the water and fish species.

Recommendation: we advise to use Tubertini 881 hook 8-10 size for the 9mm Dual Wafer, and Tubertini 881 hook 12-14 size for the 6mm size.

Item No.	Name	Weight

MAEA318	marzipan-vanilie 9mm	10g
MAEA319	fish-strawberry 9mm	10g

MAROS^{mix} Polenta

Polenta is actually a cooked, fine grounded corn-gris. Has a really sweet and strong corn aroma because of the excellent quality of ingredients. Giants love its smooth flavour pretty much. While the feeder polenta dissolves faster, hook one needs much more time. Available in several colors and tastes.

Baskets

EA Feeder baskets

Many competition experiences helped to bring to perfection all the feeders of EA series. Available the feeder series - 10-60g, river - 80-190g, and XXL - 5x5 and 5x6, 20g, for all competition situations! Its paint is lasting, and structure is massive. Because of its cylinder shaped, the feeder could be loaded pretty easy and smooth so you could control the speed of breakdown the strength of pressure. There's probably no better example of how superb these EA Feeders are, than the following results: Erdei Attila's 3 hungarian individual titles, and one individual World Champion title.

MAROS^{mix} Feed pellets 1-3 kg

The main function of a good pellet is adding large fish to the place of feeding and also keeping them in such a wide area. All MAROS pellets have this ability thanks to the extremely high protein, oil and vitamin content. They are various sized - while tiny pellets take a few minutes before they turn to mush, bigger ones will take hours or days to fully break down.

No.	Item no.	Name	Size (mm)	Taste	(kg)

Soile and additives

MAPOS^{mix} Soile and additives 0,1–2 kg

The main reason for using soils is that they are the perfect carrier for putting joker into the water, because it keeps it alive! Other advantages are that it adds weight, makes a cloud, creates noise, has no food value and can be structured in such a way as to break down at different speeds thereby releasing joker into the water over a long period. Actually bream fishing couldn't be imagined without using any soil - especially loess.

MAEG02	Mixing head - big	Stainless steel

Item no.	Name	(liter)
MAEG18	Bucket	12
MAEG03	Bucket	17
MAEG04	Bowl	40

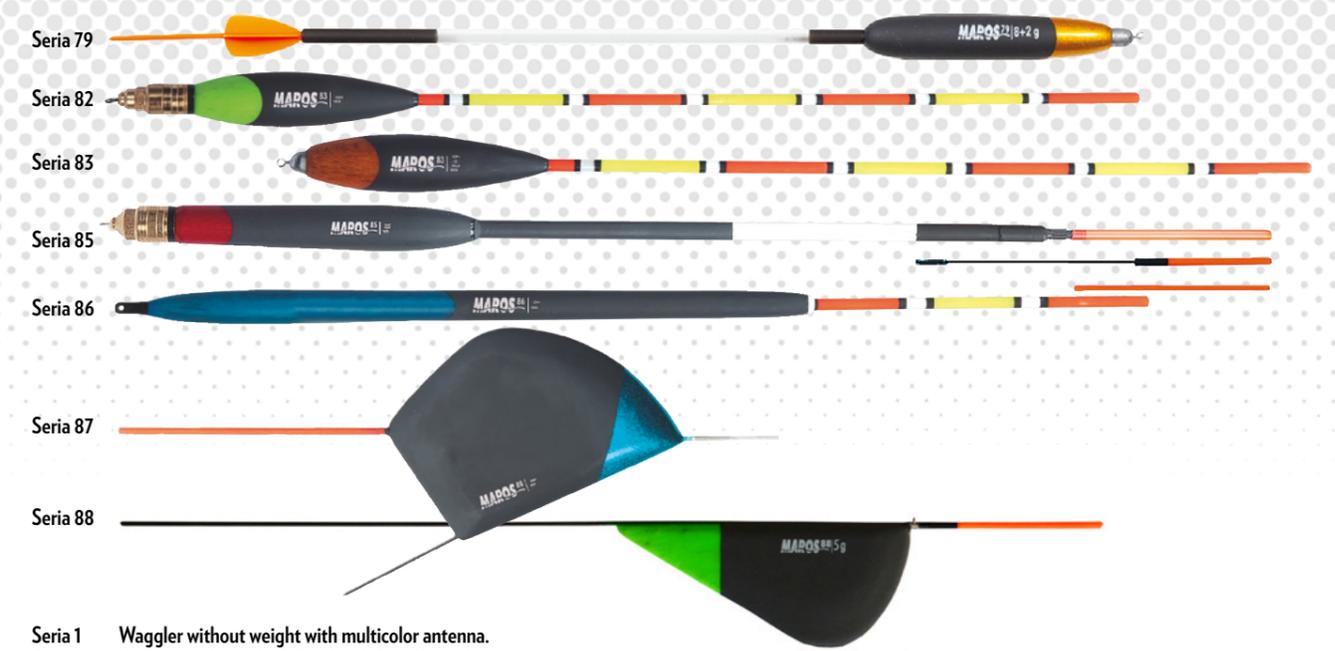

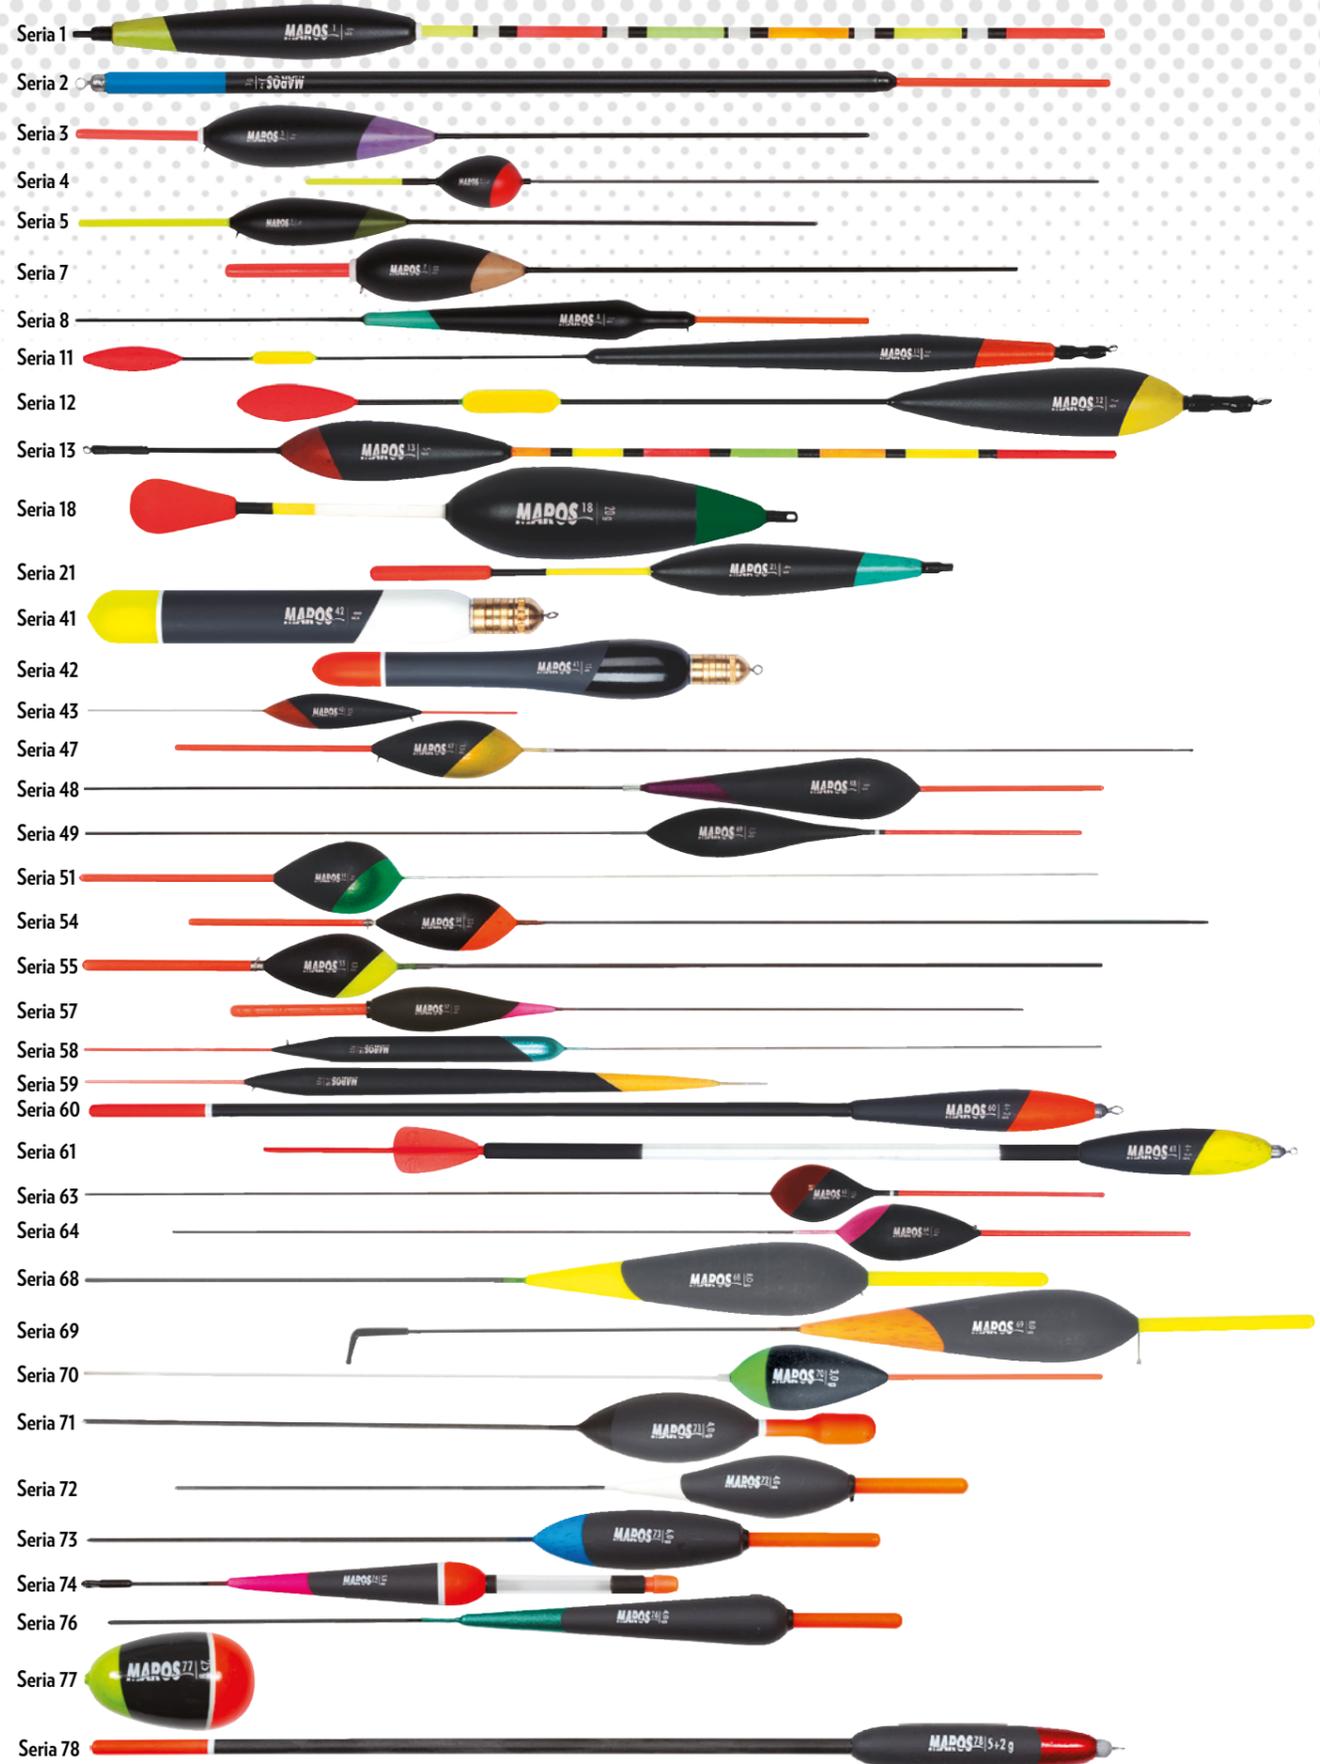

Sevo Walter Bucket and bowls

We all use these „bait-control” buckets and bowls in matchfishing for decades. These high quality buckets are suitable for mixing and storing the groundbaits and their most important feature is, that their sizes are accepted by the international federation as well. So they can be used for presenting groundbaits at the bait-control in both national and international competitions.

Item No	Name	(liter)
MASWEG01	Bucket	12
MASWEG02	Bucket	17
MASWEG03	Bowl	40

Floats

- Seria 1 Waggler without weight with multicolor antenna.
- Seria 2 Waggler without „body” and with fix self-weight.
- Seria 3 Thick float with changeable tip and glass-stem, ideal for fishing in river.
