

MAROS

2023

ABOUT US

If you take your time and read through the introduction of our company, you will immediately see how the past and present of Maros Mix Ltd. go hand in hand with the development and success of Hungarian match fishing. 30 years ago, two members of the then dominant Makó match team have decided to use their vast experience and began producing high-quality groundbaits for all anglers. Ever since, recipes have been constantly refined and new groundbaits and hookbaits have been developed, making our current product portfolio suitable for all fishing conditions and situations.

In addition to the MAROS brand, the product range of Maros Mix Ltd. also features the ever-expanding line of EA products, building on the expertise of our field tester Attila ERDEI. Furthermore, combining the knowledge of World and European champion Tamás Walter and the decades-old manufacturing competence of Maros Mix, our Serie Walter product line offers a new class of solutions for float and feeder fishing. Finally, we are also official distributors of the Italian Tubertini company for the Hungarian and the Romanian markets.

We are very proud of the growing interest in our products not only in Hungary but also abroad.

We remain strongly convinced:

„Using MAROS products is not the only way to successful fishing but it definitely makes catching fish easier for everyone.“

OUR MATCH ANGLERS

RESULTS 2022

Hungarian match anglers had a great year in 2022 and we are very proud of the Maros Team members who contributed to the many international medals and trophies.

Our team has won both feeder club nationals this year! The **Maros-WalterLand Team** is both feeder and method feeder Hungarian club champion of the year!

Péter Bakó defended both his world cup individual and team title in method feeder fishing and obtained a silver medal in the method feeder national following last year's gold medal.

The individual champion of last year's Masters Coarse World Cup, **Tibor Ambrus** has now won the individual world cup title in the first Masters Feeder World Cup, becoming the first angler to win both individual titles in the masters category! He was accompanied on the world champion team by **Attila Erdei**, Hungarian masters feeder and coarse champion. In addition to his two masters champion titles, Attila has also won his fourth Hungarian feeder champion title in the „premier” league.

At the Ladies Coarse World Cup, the Hungarian squad lost its team title by 1 point only and the individual title was also very close with Maros Team member **Diána Walter-Barna** coming in second and **Hajnalka Savanyó-Kovács** in third place.

Congratulations to all competitors!

ECO

The ECO line of groundbaits is perhaps the most popular among the Maros groundbaits on the market. Pellet tuning technology has further enhanced the effectiveness of these mixtures. The introduction of this new production technology in this price segment has been a brave step. The groundbait attracts fish into your swim and they will spend extra time there looking for the pellets, making your fishing session more successful. Easy preparation of this mix makes it ideal for all anglers. For even better results, feel free to add Maros additives best suited for your specific fishing condition. This product line features a range of package options (1, 3, 8 and 15 kg) as well as 20 different flavours, offering a solution for most fish and water types.

FEEDER

This product line has been developed for feeder and traditional ledger fishing techniques. These mixtures are binding enough to be cast but will quickly begin to work once they hit the bottom, attracting fish immediately into the swim. The strong flavour and smell will yield surprising results even in highly pressured waters. This effectiveness is a result of the HIGHER DOSE of additives used during the production process.

FEEDER-GROUNDBAIT

Item no.	Description	Flavour	Packaging (kg)

XXL

This product line is the fruit of decades of match angling and groundbait production experience. All XXL mixtures are based on carefully selected first-class ingredients and special technology is applied to produce groundbaits for demanding match purposes. Many national and international trophies were secured using these recipes. Our match anglers have tried and tested the XXL groundbaits during practise and match sessions across Europe and their feedback has been used to fine-tune the products. The homogenous and ideal degree of roasting of the seeds and the creation of the perfect flavour contribute greatly to the effectiveness. Whatever your fishing situation, you will surely find a solution in the XXL match portfolio. Depending on the circumstances, use them for float, feeder or method fishing.

METHOD BOX

One of the most successful groundbaits for carp, the Method Box is made of premium quality halibut pellets and boasts a very strong aroma. Tried and tested for years, it will not let you down in the worst of conditions even when other baits give up. Available in 500+100 g packages. Each Method Box contains one decilitre of Maros Mix Extra Activator, which is a delicious aroma concentrate. Due to its special ingredients, this activator will spread horizontally on the bottom while dissolving. Carp are mainly bottom feeding fish and the activator will help them find the groundbait itself.

METHOD BOX

SWEETENER

Flavours are very important when fishing for silvers. Groundbaits come in various flavours like salty, fishmeal, lactic acid, butyric acid, garlic, etc. On the other hand, a significant portion of groundbaits is a spicy, sweet or fruity mixture based on carbohydrates. The sweet taste of the mixtures is a result of the simple and complex sugars that are extremely soluble in water, but this effect can also be easily achieved by sweeteners that far exceed the sweetening effect of sugar. Use this additive carefully in tiny lakes but more bravely in large open waters with a current. When the water temperature is low, the liquid sweetener is the better choice.

Item no.	Description	Packaging (kg)	Packaging (ml)
MAAD125	Liquid sweetener	-	250
MAAD126	Powder sweetener	0,1	-

BLACK COLOUR ADDITIVE

When preparing the right mix for your venue, sometimes you need to adjust the colour of your groundbait. This is very important in clear water and during winter sessions when fish are extremely wary. This colour additive comes in dry powder form and should be added to your dry groundbait and mixed thoroughly with a whisk. Add more powder or whisk the mix longer to obtain a darker shade.

Item no.	Description	Packaging (kg)
MAAD117	Black powder paint	0,05

Adding liquid attractants to your groundbait is often the right path to nice catches. These soluble concentrates will dissolve quickly in the water, spread over a larger area and pull fish into your swim. Many groundbaits have their own base flavour and aroma, but this can be improved further or fine-tuned for your specific target fish. Available in 220 and 500 ml versions, you can use them for both easy fishing and when heavy feeding is required. Add 50-200 ml to 1 kg of groundbait. For carp, grass carp and crucian, we recommend sweet and fruity flavours. Spicy flavours are great for silvers while cheesy aroma should be your first choice when river fishing for barbel, nase and vimba. Apply the liquid attractant more generously when the water is colder and use it carefully when the water temperature is higher. When fishing in strong currents, don't be afraid to add more to your groundbait but be cautious when fishing in still water and tiny lakes.

LIQUID AROMA 20 ML

Item no.	Description	Flavour	Packaging (ml)
MAAR01	Vanilla	vanilla	20

CSL 500 ML

CSL attractants are available in bottles of 500 ml. Its sour and strong flavour is beloved mainly by big carp. Due to its high alcohol content, it will dissolve well even in colder waters. These liquid attractants are PVA friendly and will not dissolve your PVA accessories like mesh, line, etc. The PVA friendly logo is featured on the bottles.

Item no.	Description	Flavour	Packaging (ml)
MAAR24	CSL Natural	natural	500
MAAR25	CSL Honey	honey	500
MAAR26	CSL Strawberry	strawberry	500
MAAR27	CSL Fish	fish	500

ACTIVATOR 250 ML

These oil-based liquid attractants in 250 ml bottles come in handy when you need to boost your groundbait. Due to its oily nature, your groundbait will deeply absorb this liquid and the flavours will dissolve slowly in the water, creating a long-lasting underwater effect. In addition to the traditional sweet-fruity flavours, you will also find special flavours on the palette such as garlic, krill, halibut, green betaine, squid, octopus and butyric acid. Dense and very high quality, these additives are perfect for method fishing.

Item no.	Description	Flavour	Packaging (ml)

BÜDÖS NAGY PONTY

STINKY BIG CARP

Fermented seeds have been used successfully in carp and grass carp fishing for a long time. Finer groundbait and soft seeds are easily picked up by small fish but large fermented seeds will stay longer in your swim for the big boys. With their activity, the fermenting bacteria reveal and make the nutrients of plant tissues and seeds easier to digest. This is exactly why stored and fermented fodder is used so much in animal husbandry. The typical lactic acid flavour of these seeds will pull big fish into your swim, especially big carp and grass carp. Use them for feeding or as hookbait mainly during the summer months when the water temperature is high. The dry and ready-to-use fermented groundbaits are ideal for ledger and feeder fishing for big fish. The flavours will dissolve quickly, spread over a large area and attract big fish towards your hook. Use these groundbaits on their own or as a carrier for the fermented seeds in your feeder.

Item no.	Description	Packaging (kg)
MABNP01	Stinky Big Premix Carp groundbait honey	0,8
MABNP02	Stinky Big Premix Carp groundbait strawberry	0,8

READY-TO-USE GROUNDBAIT

Pressured by lack of time? Don't feel confident preparing your own groundbait? Don't have the proper accessories (bucket, riddle whisk, etc.) to prepare your groundbait? Don't want to waste a lot of time measuring the right amounts, mixing the ingredients, gradual wetting, adding attractants and riddling the mix? By the way, it always comes in handy when you have a bag of ready-to-use groundbait in your carryall which you can open up and start feeding immediately. This is when Maros Ready groundbaits will save your day.

Item no.	Description	Packaging (kg)

FLOATS

ACCESSORIES

One of the oldest and most effective hookbaits, cooked seeds can be used all year round for a successful fishing session. Indispensable for carp and grass carp fishing these days, you can add them to your groundbait, catapult them around your float or use them for initial baiting. The really large and nice seeds can also be placed on your hook.

FEEDING PELLETT

Pellets are versatile baits designed to attract and hold big fish in your swim. Not all pellets are created equal, but Maros Mix Pellets are certainly the right choice if you are serious about catching a lot of fish. Available in different sizes, our pellets have various dissolution times. Their extremely high protein and oil content and their special vitamins are almost addictive even for the largest and most wary fish.

Item no.	Description	Flavour	Packaging (kg)

MAPE325	Time bomb pellet mix 3-16 mm	3

SPECIAL HALIBUT PELLETT

Premium quality pellets primarily for feeding. Very high fishmeal and fishoil content. Available in 800 gr, 3 kg packages.

Item no.	Description	Packaging (kg)
MAPE126	Special Halibut 2mm	0,8
MAPE127	Special Halibut 4,5mm	0,8
MAPE128	Special Halibut 6mm	0,8
MAPE129	Special Halibut 8mm	0,8
MAPE130	Special Halibut 14mm	0,8
MAPE131	Special Halibut 20mm	0,8

DRILLED PELLET

These pellets with high fishmeal and fishoil content are drilled. Sizes of 8, 14 and 20 mm allow you to sort out various carp sizes and to adapt to various fishing conditions. The larger, 0,8 kg bags and 3 kg buckets are ideal for feeding on multi-day fishing trips.

Item no.	Description	Packaging (kg)
MAPE118	XXL Carp 8 mm	0,8
MAPE113	XXL Carp 14 mm	0,8
MAPE114	XXL Carp 20 mm	0,8
MAPE119	XXL Halibut 8 mm	0,8
MAPE116	XXL Halibut 14 mm	0,8
MAPE117	XXL Halibut 20 mm	0,8

SILICONE HAIR RIG, SILICONE TUBING

Very soft and elastic, these silicone hair rigs are perfect for easy and quick baiting, even with large hookbaits.

Item no.	Description	Packaging (pieces)
MAEG13	Silicone hair rig bait stop short	24
MAEG14	Silicone hair rig bait stop long	24
MAEG15	Silicone hair rig bait stop band	24

Used for pole and running line floats, rig stoppers, olivettes and to trap the hair against the hook shank.

Item no.	Description	Packaging (m)
MASZ120	Silicone tubing black 0,3 mm	0,5
MASZ121	Silicone tubing black 0,4 mm	0,5
MASZ122	Silicone tubing black 0,5 mm	0,5

MASZ125	Silicone tubing black 1,2 mm	0,5

BAIT-SPIKE

Bait-spikes play an important role in method fishing. Available in three sizes, they can be used for a wide range of hookbaits. The shortest 5-6 mm spikes are suitable for pop-ups and wafers. Medium and long spikes of 8-12 mm are suitable for larger wafers and bait combinations such as corn-pop-up, tiger nut-pop-up, boilie-pop-up, etc.

Item no.	Description	Packaging (pieces)
MAEG22	Bait-spike 6 mm	10
MAEG23	Bait-spike 9 mm	10
MAEG24	Bait-spike 15 mm	10
MAEG25	Silicon Bait-spike 6 mm	10
MAEG26	Silicon Bait-spike 9 mm	10
MAEG27	Silicon Bait-spike 15 mm	10

CARP SACK, CARP UNHOOKING MAT

An essential accessory for carp hunters and pleasure anglers alike. Boasting a size of 75x110 cm, it is suitable for the safe storage of our biggest catches. Its mouth can be closed and securely fastened with a plastic fastener. Made of a silky, densely woven dark material, it will keep your fish calm even in sunny conditions. Comes with a water-resistant bag to protect your other tackle from getting wet during transport.

Item no.	Description	Packaging (cm)
MAEG34	Maros Carp Sack	70x110

The unhooking mat protects the fish and it is a mandatory accessory in many fisheries. Designed to fold into three parts to save storage space. Suitable for specimen fish as well. Dimensions: 60x100 cm

Item no.	Description	Packaging (cm)
MAEG33	Maros Carp Unhooking Mat	60x100

MEASURE TAPE

Very practical and retrievable measure tape with length of 150 cm. Essential item for your tackle box.

Item no.	Description	Packaging (m)
MAEG28	Maros tape measure	15

MAROS MEASURING STICKS

One of the fundamental tools of modern feeder fishing are the so-called measuring sticks. Without this essential accessory, we wouldn't know exactly the distance we're fishing at and also wouldn't be able to adjust our other prepared rods to this same casting distance. This latter aspect is often the paramount key to success in competitive feeder fishing (and also when using the match rod, to be frank). Our brand-new measuring sticks are made of stainless steel and will hold firmly in all grounds except asphalt, while the included tape can be set up by the meter from 1 to 5 meters. The sticks feature silicone protectors on the tips, in order to enable quick winding of the line when feeder fishing and they can also host the hook when measuring the distance for a match rod. The measuring sticks are available in a full package as well as plain, without the bag and the tape.

Item no.	Description	Packaging (m)
MAEG29	Feeder measuring stick 60 cm	0,6
MAEG30	Feeder measuring stick 60 cm with bag and tape 5 m	0,6/5
MAEG31	Feeder measuring tape 5 m	5

BUCKETS AND BASINS

Buckets with measurement indications have become widespread among float and feeder anglers, especially match anglers, during the past decades. These groundbait accessories have been manufactured according to the provisions of the international federation and are perfectly calibrated for national and international groundbait limits.

Item no.	Description	Packaging (l)
MAEG18	Bucket	12
MAEG03	Bucket	17
MAEG04	Basin	45

WHISKS

Prepare your groundbait to perfect consistency using these whisks, in most cases even without having to riddle it at the end. Made of stainless steel, these durable whisks will serve you for a long time.

Item no.	Description	Material
MAEG01	Medium whisk	stainless steel
MAEG02	Big whisk	stainless steel

HOLDALLS

The fishing rod is the most valuable asset of any fisherman and you need to protect your gear during transportation. Maros Mix holdall and luggage, manufactured from durable and ultra-resistant materials, will transport your tackle in security. Available in burgundy/grey design..

PELLET

FLOATS

ACCESSORIES

The development of EA products is based on the vast experience and information which I, my teammates, friends and colleagues have gathered during our 30-40 years of match angling. Another pillar is the almost 300 days of each year that I spend on the bank with targeted practice or match fishing. Each year I have many opportunities to expand my knowledge and sharpen my skills by visiting different Hungarian and international venues, participating in matches and fishing with my friends. All I have learned about various fishing techniques, feeding and baiting are directly incorporated into Maros and EA products. This takes a lot of my energy and time but it feels great when I see anglers having such nice catches with our products.

Attila Erdei

EA RECORD GROUNDBAIT

In recent years, the Maros Mix portfolio has been extended to include the EA Record groundbaits. These mixes are based on the secret recipes of champion angler Attila ERDEI and they are best suited for carp, big bream and crucian throughout the year. Most of Attila's trophies were achieved by these recipes. „EA groundbaits are produced by a special and secret manufacturing technology which enables easy, lump free preparation.”

Item no.	Description	Flavour	Packaging (kg)
MAEA208	EA Record river	cheese-caramel	2
MAEA207	EA Record strawberry	strawberry	2
MAEA201	EA Record roasted	roasted seeds	2
MAEA202	EA Record carp-crucian carp	vanilla-lemon	2
MAEA206	EA Record cold water carp-crucian carp	vanilla-lemon	2
MAEA203	EA Record method feeder	sweet-spicy-fishmeal	2
MAEA204	EA record special	sweet spices	2
MAEA205	EA Record extreme carp	vanilla-lemon	2
MAEA209	EA Record Special Black	sweet spices	2

It's difficult to come up with ground-breaking novelties in the field of groundbait production these days. Nevertheless, I believe the new EA IPro method groundbait is going to be a huge hit on the market. When I first read about insect protein on the Internet, I knew immediately that this ingredient must be tried in groundbaits. Up until now, a method groundbait of high protein content had to be based on the various fish meal. However, the halibut-based pellets and different pellet mixes worked mainly on waters where they were commonly used and thus the fish got accustomed to them. Insects, insect larva and insect protein are much more of a natural food for the fish, a well-known substance. We have tested these groundbaits for almost a year on numerous venues with positive test results.

EA IPRO TURBO

A typical fine-particle mixture for the method feeder. It has the perfect binding for the feeder but will break down moderately fast in the water. The dark brown colour of the mixture is suitable for clear and winter waters. The sweet-salty taste is accompanied by the chocolate-caramel duo flavour, high protein content and a few broken red halibut pellets.

Item no.	Description	Packaging (kg)
MAEA197	IPro Turbo	0,9

EA IPRO GREEN

A light green, flashy method mix which contains finely ground TTX and creates a cloud when breaking down. Due to the binding power and elastic compressibility of the mixture, breakdown time can easily be adjusted when filling the feeder. High insect protein content is enhanced by a few broken red halibut pellets. The sweet-salty taste and the almond-garlic flavour make it a harmonic mix for all four seasons.

Item no.	Description	Packaging (kg)
MAEA198	IPro Green	0,9
MAEA189	IPro Green Crush	0,9

EA IPRO ZERO

A typical natural, light-brown mixture, nothing extravagant about it. This is what the name Zero refers to. Its high protein content comes from insect protein mainly and some finely broken black halibut pellets. These characteristics and the sweetcorn flavour with a touch of citrus oil make this method groundbait the perfect choice for the summer months. It is also suitable all year round for natural venues with less fishing pressure.

Item no.	Description	Packaging (kg)
MAEA196	IPro Zero	0,9

EA IPRO POWER

Red colour and strawberry flavour are a winning combination for carp and other coarse fish. Ground red TTX, produced and distributed by Maros, is one of the main ingredients of this mixture. It is a by-product of the manufacture of maize germ oil, coloured, finely ground and flavoured by strawberry aroma and other important additives to make it the perfect method feeder mixture. It is further enhanced by the high insect protein content featured by this range of groundbaits and the broken red halibut pellets.

Item no.	Description	Packaging (kg)
MAEA199	IPro Power	0,9
MAEA190	IPro Power Crush	0,9

EA AQUA PELLETT

All these pellets in our offer are high quality extruded products. Ingredients include first class fresh sea fish meal, other animal protein, premium quality fish oil and high energy content plant oils. Proportion of ingredients varies by pellet type.

Item no.	Description	Packaging (kg)
MAEA186	Pellet Aqua Uni 2mm	0,8
MAEA185	Pellet Aqua Uni 4mm	0,8
MAEA184	Pellet Aqua Classic 2,5mm	0,8
MAEA183	Pellet Aqua Classic 4mm	0,8
MAEA182	Pellet Aqua Uni 2mm	7
MAEA181	Pellet Aqua Classic 2,5mm	7

EA AQUA PELLETT START

The EA Aqua Start mix features a higher protein content. It can be used all year round and will yield the best results during the spring when water temperatures begin to rise.

Item no.	Description	Packaging (kg)
MAEA195	Pellet Start	0,8
MAEA187	Pellet 4 Start	0,8

EA AQUA PELLETT ALL ROUND

The EA Aqua Allround mix performs well during the entire year due to its balanced protein, fish and plant oil and fat content. Best performance was observed during the summer months perhaps.

Item no.	Description	Packaging (kg)
MAEA194	Pellet All Round	0,8
MAEA192	Pellet All Round Crush	0,8
MAEA188	Pellet All 4 Round	0,8

EA AQUA PELLETT COLD

The high energy content EA Aqua Cold is true to its name, offering the perfect solution for the winter months.

Item no.	Description	Packaging (kg)
MAEA193	Pellet Cold	0,8

EA PELLET COARSE CRUSH

A rough-particle ground version of the high-protein content pellet, which has proved itself in modern carp fishing already. After wetting, use it on its own or mix it with pellets for feeders and method feeders. Being crushed, it will activate immediately once it hits the water and draw a line of particles as it sinks to the bottom, attracting fish into your swim and raising their appetite. Feel free to enhance it further by the use of additives, but it will also stand ground on its own.

Item no.	Description	Packaging (kg)
MAEA191	Pellet Coarse Crush	0,8

EA DUAL WAFER

During the method fishing sessions of recent years, I have come to the conclusion that the most important characteristics of a wafer pellet are its ideal size and optimal buoyancy. I mean its buoyancy must be perfect to balance the weight of the hook and its diameter must correspond to the size of the hook. Only when these parameters are in line can we begin to think about the colour and flavour of the pellet.

I think the sizes of 6 and 9 mm and the five pairs of flavours will give you enough choice to select the right pellet with the most effective size, buoyancy, colour and flavour for a given water and target fish.

Item no.	Description	Packaging (g)

EA POP-UP PELLET

Building on the success of EA dual wafer hookbait pellets, we have introduced a new line of hookbaits to the market, the EA pop-up pellets. Available in 5 different colour shades and flavours, there is always one to choose for your fishing conditions. The jars contain a mixture of 8-10-12 mm pellets and thus offer many baiting combinations.

Item no.	Description	Packaging (g)

MAPE248	Sweet-Strawberry	15
MAPE249	Halibut	15
MAPE250	N-Butyric	15
MAPE251	Corn	15

EA METHOD FEEDER

In addition to the open, ring and bullet feeders, we are proud to introduce the EA method feeder into the Maros assortment. Its final shape and range of weights are based on the experience of previous years and an entire year of developmental work. The method feeders are available in sizes L and XL, in a wide variety of weights. We were focusing on creating a new assortment which can serve as a solution in many different conditions, providing at the same time a bit of extra value when compared to the products already on the market in this category. The feeders feature non-toxic, sintered metal weights, and we believe this is important for environmental considerations. The ribs on the plastic upper part of the feeder are much more open when compared to similar products, allowing the fish to get better access to the baited hook and the hook is also much less likely to get caught up on the ribs. This was all accomplished while ensuring the groundbait will stay on the feeder all the way to the bottom of the lake. These method feeders are available in both inline and elasticated versions. A common problem of elasticated feeders, rapid aging of the elastic, has been eliminated by selecting the top-quality Hybrid elastic of the Tubertini company for this application. This elastic contains a special colouring which protects against UV rays and ensures a longer lifetime. Both the sliding tube in the inline version and the fixed, elasticated tube can be replaced and exchanged. The proven shape of the feeder and the slightly longer sliding tube and elasticated tube all result in easy, precise and distant casts.

GROUND BAIT

PELLET

FEEDER

REELS, SEATBOX

ROD

ACCESSORIES

Complementing the EA Method Carp Feeder and the EA Trinity Feeder rods, we are happy to announce the arrival of the Tubertini EA Method Reels, building on our cooperation with the Tubertini company. This is a beautiful reel of expert engineering, fruit of the Japanese design displayed on the foot of the reel and our own concepts and requirements. The foldable handle makes the transportation of geared rods very easy, saving space in the holdall. Comfortable and moderate retrieval is ensured by the 5:1 gear ratio and smooth run is provided by 4+1 ball bearings. The bail arm is made of a tubular cross-section material. The metal spool is slightly elongated and it yields a perfect line profile. Due to the rapid front drag, you can fix the spool with a single move prior to casting, protecting your fingers from the slipping line. Following the cast, you can re-adjust the drag power again with a simple move.

EA METHOD 5000

The „little brother“ features a lower weight and a smaller spool size, suitable for more delicate fishing. Weight of the reel is 290 grams and it makes a perfect combo with the 2,7-3,0 metre light and medium-light rods. It is the best solution for fine feeder fishing on long hooklengths and method style fishing at shorter distances, up to 60 metres. The shallow spool hosts 180 metres of a 0,18 line. A spool size of 50 and the 5:1 gear ratio result in a slightly slower retrieval but a smoother run in return.

Item no.	Description	Size
9D003XX	EA METHOD 5000	5000

EA METHOD 6500

This size 65 reel features a metal spool, 4+1 ball bearings and a weight of 380 grams, making it the perfect partner for the 3,6-3,9 metre feeder rods. Its potential begins to show when casting at distances over 50 metres. A single turn of the handle, depending on how much line there is on the spool, retrieves ca. 90 centimetres of the line. The shallow metal spool hosts around 180-200 metres of a 0,20 line. This reel is an ideal solution for feeder fishing on long hooklengths at greater distances and for method style fishing, perhaps even for match fishing at long distances.

9D004XX	EA METHOD 6500	6500

EA QUATTRO SEATBOX

Based on the ideas of Attila, this seatbox is manufactured by the long-established Italian company for the most demanding anglers. The seatbox features a pure aluminium frame with a strong and resistant powder coating. It is suitable for all methods of fishing. Setting up on the bank is a breeze due to the four 36 mm legs and the two water levels. The legs are fixed using a new technological concept and thus ensure perfect positioning even under heavy pressure, without the risk of sliding. The legs are equipped with the well-known claw-feet for a steady stance on all surfaces. The special design cushion boasts a memory foam between the two gel layers, offering the ultimate back support even during long competitions. The two-drawer module below the cushion provides plenty of space for the safe storage of your essentials.

The most important characteristic of the seatbox is its strength, coupled by a surprisingly low weight.

Weight: 14 kg, width: 70 cm, folded length: 54 cm, full length: 82 cm

Item no.	Description	Size
MAEA004	EA QUATTRO Seatbox	70x54/82

EA TRINITY FEEDER

The EA Trinity feeder rods are new and improved versions of a former range of Tubertini rods, incorporating the vast experience of Attila Erdei. Most notice the split EVA handle first and the reel seat also got moved forward a bit to provide a better forearm support. The eva handle makes rod maintenance easier. We have kept the 2+1 section structure, which performs very well under pressure. The rod is ultra slim and stiff, but at the same time yields a nice bend under pressure and absorbs shocks from hard fighting fish of various sizes.

The shortest 2,7 and 3-meter versions are best suited for casts between 10 and 25 meters. In addition to margin and canal fishing, they can also be great companions for boat fishing. Use these beauties with a fine feeder rig and a long hooklength. I believe the top-pick amongst ambitious match anglers will be the 3,30-meter light version. Its main targets are whitefish and it's a perfect choice for winter carping as well. During its one-season test period, this rod has helped me to section wins at the Hungarian Championship in Szeged and at the World Championship in Italy.

The 3,60-meter medium rod is suitable for casts up to 50 meters and can also be used with light method rigs.

Our product development resulted in having rings of the right sizes and in the right positions, making this a very handy rod.

Even the quiver tips have been further developed. There is one additional ring on the tips and this yields a more consistent power distribution and bend. Furthermore, the tips have different potentials (0,75; 1 and 1,5 oz) but identical lengths. This is a great advantage when transporting your rod as there is no tip reaching beyond the lower rod section.

I hope the EA Trinity light feeder rods bring you many years of good memories and you'll enjoy them as much as I do.

Attila Erdei

EA METHOD CARP FEEDER

These carp feeder rods have been developed for the specific needs of anglers using the method technique. Using the 3,6 meter rod with the 30-100 g MH casting weight, you can comfortably fish 70-80 meters from the bank. Depending on the exact distance, we recommend using a method feeder from 20 to 60 g. Gear up your rod with a size 60 reel, fully spooled with 0,18-0,20 mm main line. To be on the safe side, apply a shock leader of about 7 meters using a stronger braid on mono. The rod comes supplied with 1,5-2-3 oz quiver tips.

A bit stronger version of the family, the 3,9 meter rod has a casting weight of 40-120 g (heavy). Using the above reel, lines and feeders, you will easily fish at a distance of 90-100 meters. Supplied with 2-3-4 oz quiver tips.

The 4,2 meter rod is best geared with a 60-80 size reel with similar lines as above, allowing casts of up to 130 meters. With the 40-120 g MH cast version, you can use method feeders up to 80 g. In windy conditions, you might have to stretch your feeder weights to the limits to achieve precise casts.

The ideal option for these rods is the 2 oz quiver tip, with the 4 oz tip as a back-up option for fishing in strong rivers. Designed to have optimal strength for casting, the EA Method Carp rods are at the same time soft enough to minimise fish loss and allow the use of sensitive hooklengths.

FEEDER ROD RESTS

Setting your rod right during your fishing session is equally important whether you're using a seatbox or a chair. Our feeder rod rests give you the perfect choice for all situations, be it a feeder arm on a seatbox or a rod pod/bank stick right next to your chair. Featuring a standard thread, light and durable cast aluminium and an alluring velvety surface, EA feeder rod rests are suitable for all situations.

EA KEEPNET

Premium keepnet by the prestigious tackle manufacturer Tubertini, based on Attila's innovative ideas and inputs.

- Fish friendly micro-mesh for the sake of the fish.
- Super resistant, for waters dominated by carp, crucian and bullhead.
- Reinforced frames, the bottom three being made of metal for better sinking and fish comfort.
- Adjustable, strong mouth for the perfect set up on the bank.
- Reinforced seams and fabric on the frames for greater abrasion resistance and safe lifting of heavy catches.
- Length of 3,5 metres according to international standards.
- Rectangular shape of 50x40 cm, keeping straight even in strong currents.

SW PICKLED CORN

The new Serie Walter Pickled Corn is a great example of a development being born on the match venue and then moving into everyday fishing. If you want to focus on certain species and avoid the attack of small fish, you need to choose your hookbait corn carefully. Our pickled corn has the perfect size, shape and durability when you are after the big fish.

Item no.	Description	Packaging (ml)
MASW099	SW Pickled Corn Garlic	212
MASW098	SW Pickled Corn Honey	212
MASW097	SW Pickled Corn Shell	212
MASW096	SW Pickled Corn N-Butyric	212
MASW095	SW Pickled Corn Pineapple	212
MASW094	SW Pickled Corn Strawberry	212

The favourite feeders of Tamás WALTER, from 10 to 200 g, for all match situations. Due to its special surface treatment, they will not trap your mix and will also not shine on the bottom. Made of high quality steel mesh and featuring a compact design, they will fly through the air easily and help you fish precisely at your desired distance. The matte black colour is a result of powder paint and all edges are rounded for maximum comfort and safety.

BIG

The BIG gun! Maximum size allowed by FIPSeD (5x7 cm), with removable plummet. Ideal for initial baiting.
